

Gaming soundKey Advanced in-line DAC designed for ultimate performance

Product Information:

The soundKey is an in-line DAC upgrade that offers vastly improved audio quality for mobile devices, PCs and Macs.

Using a high quality digital to analogue converter combined with a small but powerful amplifier and carefully tuned components throughout, soundKey delivers an acoustic punch that belies its tiny size.

When combined with high-quality headphones, the improvements are amplified, clearly revealing detail of movement and other audio cues, creating a soundscape as detailed as it is powerful.

Drawing power from the source, the soundKey is free of the need for internal batteries or recharging.

soundKey is supplied with cables for connection to most computers and works with wired headsets both with and without microphones.

soundKey features and benefits:

Works with all major OS

soundKey is compatible with most mobile devices including Windows 10, Android 5+ and iOS9+ (all require OTG connection).

Low power consumption

Extremely low current drain conserves battery life in mobile phone and tablet sources.

File compatibility

Compatible with a wide range of audio formats, including MP3, AAC, and FLAC.

High resolution capability

soundKey handles High Resolution audio files up to 24bit/96kHz.

Small and lightweight

Weighing in at under 20g, the ultra-slim soundKey is the perfect, portable partner for mobile phones.

Robust aluminium casing

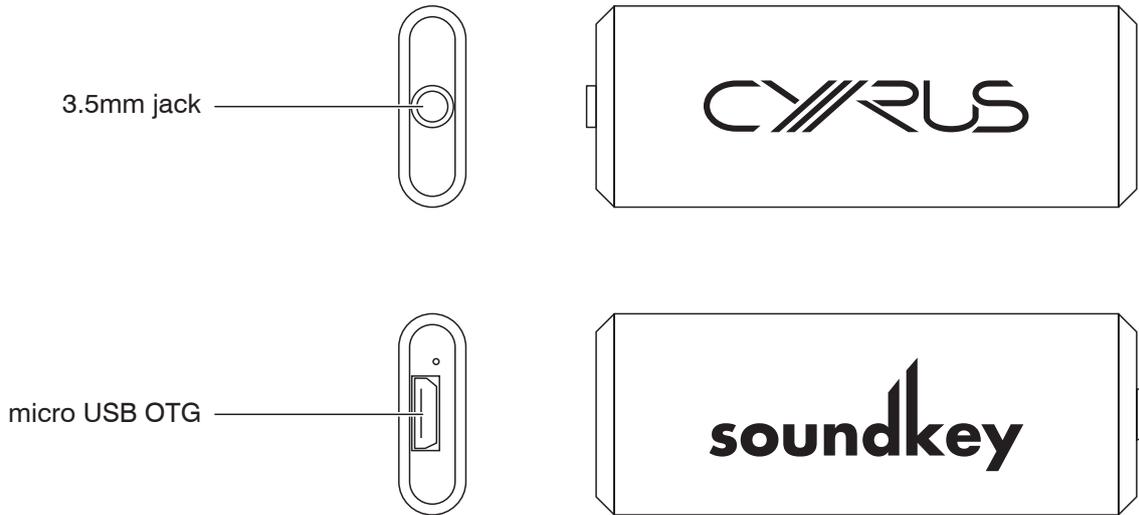

The soundKey is housed in a durable aluminium case. The hard-anodised finish is harder-wearing than paint finishes to keep soundKey looking good for longer.

Range of colours

soundKey is available in four stylish colours - black, red, blue and purple.

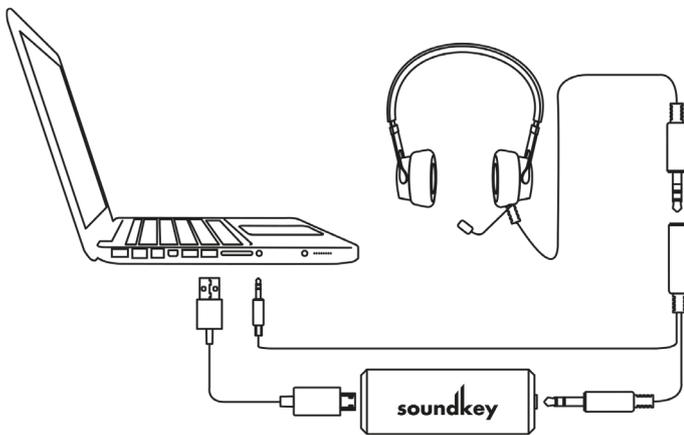

Cyrus audio products are designed, manufactured and supported at our headquarters in Cambridgeshire, England.

Typical connection

The diagram below shows soundKey connected as an upgrade to an Android mobile phone.

soundKey Specifications

Works with Windows 10, Android 5+ and iOS9+*
