PRODUCT GUIDE

CDi-XR

The CDi XR was designed as a reference integrated CD player, building upon the legacy of the multi award winning CDi. Housed within our iconic half-width chassis, the CDi-XR sits above the existing CDi and CDt models, offering a substantive performance upgrade.

What Hi-Fi rated the CDi-XR a 5 Star product, and uses the CDi-XR in their listening room, so don't just take our word for it, book a demo with your local Cyrus dealer to hear your CDs like never before.

PRODUCT FEATURES

Servo Evolution

The Cyrus philosophy for reading CD has always been the same- read it once and read it accurately. The latest iteration of Cyrus' Servo Evolution technology in the CDi-XR does exactly this, streaming the data from the disc to the audio processing circuitry with precision and accuracy.

Power Supply Design

Within a CD player is a complex mix of signals including fast digital audio, sensitive analogue audio, high current servo and system control. To minimise interaction between these circuit stages the power supply design of the CDi-XR is completely segmented. The digital control circuits run from a dedicated, high-efficiency supply, with other parts of the player powered from an over-specified linear power supply with toroidal transformer. Nine individual stage regulators smooth and distribute power within the player according to demand.

PSU-XR Port

The CDi-XR includes a port for the PSU-XR external power supply, which raises the bar by sourcing no less than five independent regulated supplies in a single box. For the CDi-XR four of the PSU-XR power supplies are employed. One pair to provide ultra-smooth power for the analogue audio circuitry, one for the currenthungry demands of the motors and one just to provide an ultra-stable supply for the PLL digital master clock circuit, reducing any power supply related jitter to a minimum.

Digital Performance

The CDi-XR DAC design includes the highest specified Sabre DAC. This, partnered with a highspeed analogue stage with excellent dynamic range delivers exceptional noise and THD performance from the DAC stage.

PRODUCT SPECIFICATIONS

- Integrated CD player
- 32 bit 2nd Gen QXR DAC
- Servo Evolution technology
- Twin analogue outputs
- Optical and coaxial outputs
- PSU-XR upgrade port
- User upgradable firmware
- iR14 Remote control included

- Size (H x W x D) 75 x 215 x 355 mm
 (2.95" x 8.46" x 13.98")
- Weight 3.7kg (8.3lbs)
- EAN 230V 5060019434239
- EAN 115V 5060020434327

"Overall, it's a hugely impressive performance that puts the CDi-XR in the front row at this price as far as CD-playing sound quality is concerned."
